## Work Experience

### **Product Manager, Pendulum Chain, Remote (Aug 2021 - Present)**

The Pendulum chain operates as a parachain within the Polkadot ecosystem, aiming to solve the B2B forex challenges using DeFi

- Leading the [Portal](#) dApp development. A single point interface for the Pendulum chain features, from concept to v1 release. Additionally, I oversee the integration of [Nabla](#) Fiat DEX into Portal.
- Leading all technical integrations for the Pendulum chain, acting as the central point of contact with Indexers, oracles, wallets, explorers, node operators, RPC providers, and other ecosystem partners
- Successfully managed to secure the parachain slots for the Pendulum chain and the sister chain Amplitude. Additionally also supported in formulating the tokenomics of both chains.
- Other responsibilities include managing the backlog, planning sprints and releases
- Took additional responsibility of organizing DeFi flash talks for the broader team to discuss upcoming DeFi trends.
